- Expo
- Node
- Git
- Nest
- Design
- Marketing
- Computer Hardware
- Java
- C#

Languages

Portuguese: Native
English: B2 (CEFR)- I'm studying to improve.

Gustavo Schultz

FRONTEND DEVELOPER

Personal Statement

I am a self-taught professional with solid skills in web and mobile development. Currently, I am expanding my knowledge to include backend development, exploring languages such as C# and Java.

My motivation in programming goes beyond simple skill enhancement; I constantly seek new challenges that allow me to grow professionally. Additionally, I am committed to improving my proficiency in English, recognizing its importance in the global technology landscape.

Regarding my soft skills, I highlight my leadership ability, friendly approach, and infectious enthusiasm. I am recognized for my creativity and ability to work collaboratively in a team setting. However, I consider my ability to learn quickly as my greatest strength, enabling me to assimilate new concepts and technologies with ease.

Experiences

Frontend Developer

Firedev IT - 12/2021 to 07/2023

I improved my front-end developer skills a lot, my programming logic, my communication and i learn new skills.

I performed code refactor and faced challenges.

The main tools i used was ReactJS, React Native, Typescript and NodeJS.

Frontend Developer

EGS Sistemas - 10/2023 to now

I develop mobile and web applications using ReactJS, React Native, Expo, TypeScript and Next.js.

The main things that I improved at EGS, no doubt, were making animations for mobile and improving application performance.

What I liked most to learn was making complex dashboard graphs both for mobile and web.
